

# Arup in Denmark

4th of April 13:00

DTU - Building 116- Auditorium 83

*“Join us for a presentation of Arup’s projects in Denmark and around the World, such as the Roskilde Fjord Link, the Femern Tunnel and the Copenhagen Cityringen and explore the opportunities Arup provides in the projects it does.”*

# We shape a better world

Founded in London in 1946 by Danish Engineer Ove Arup, Arup is currently involved in many of the biggest projects in Denmark and around the World. With the new permanent office opening last year in Copenhagen, Arup looks forward establishing itself as one of Denmark's leading design consultancies. To help us succeed in our goal, we are looking for young, talented and diverse engineers.

So join us for the presentation and find out how Arup could support your development, whether it is in design, consulting or research & development.
